Thri-Fractal Star Nations Alliance

5TH WORLD ASSEMBLAGE

On Solar Monkey, kin191 of the Electric Storm year, (27/08/08 Gregorian), Thri Fractal Psi Operatives performed ceremony at Kellie Law in the Kingdom of Fife, Scotland, intending the awakening of collective consciousness to the fact of 5th World (Golden Age) assemblage.

This evolution is transcending the limited mind of the 4th World military and industrial complex and the lock down of constraint and limitation.

On Planetary Human, kin 192 (28/08/08) High Lamas sat in meditation for 18 hours with a clear focus of intent that the 2nd law of thermodynamics, the heat death law, be transformed in the collective consciousness such that the laws of Infinity may establish the evolution of awakening which is the supreme gift for all who choose the dharmic opportunity of these changing times.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION

Earth is a potentially paradisiac environment in which to experience life. But at the dawn of the 21st century the planet is ravaged by killing, destitution, poverty, disease, corruption and abuse. This is because a very few men choose to sustain a permanent war economy in order to continue to accumulate for themselves. The people of the 4th World entropy are slaves to this greed. Thousands of human beings die daily because of it.

This situation is absolutely unnecessary.
The military-industrial complex can be transformed without a fight.

This document sets forth a clear and workable 70% Plan of action to facilitate this transformation. It is a start point with built in flexibility. The Human Race is at a choice point. The Zero Point akin to the task of passing the camel through the eye of a needle. Full 5th World Assemblage must start NOW.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION

The transformation of consciousness that is taking place now is the evolution of the human being into the expression of a 'True Human' as described by Native American Elders. A 'True Human' is a person who is 'one-hearted', i.e. there is no hidden agenda. Someone who is transparent in the manner in which they conduct their lives. The Individual Soul Self is expressed in betterment of the whole community within a culture that has, since a child's birth, sought to enrich the uniqueness of individuality.

The enslavement of the 4th World human is the advent of closed system thinking and finite science. The machinery of the industrial revolution was created to serve us, but it has created an economy that is employed to constrain and control us. We have given money greater value than we give value to life. We have forgotten that life is Sacred. The arena of the greatest profit is war. The people are clamped, ball and chain, to taxation through the gross governmental spending on the military. This extends to all arenas of research, including aerospace, which extends to 'Black Ops', ET back engineering and anti-gravity technology, the pharmaceutical/medical industry etc. Alongside the hidden 'black budget' of covert operations the measure of global spending is appalling while children die of starvation and we continue to neglect the sanctity of life in every respect.

The Thri-Fractal Star Nations Alliance, via Psi Operations has successfully secured exopolitical agreements and contracts that have given rise to the terrestrial base of the 'Elohim Cosmic Enforcement Agency' and the establishment of the 'Contact Zero Network', the 'Arcturian Protectorate' and the 'Pleiadian High Council'. Among Psi Ops. activities the Symbols of Alchemy have been liberated from the hands of secret societies such that they may be applied as tools by all people in assembling the 5th World without being shrouded by occult misrepresentation. In fulfilment of ancient and Templar Prophecies and through international co-operation, the Philosopher's Stones have returned to Scotland. On 25.6.2.14, kin 218 (06/01/08), at the exact zenith of Sirius, the 5th World Timing Standards based on Time Science and Infinity Codes were anchored and established as formal assemblage of the 5th World actualisation, with full consciousness that it was the zenith of Sirius in 1582 that anchored the reformation of the Gregorian Calendar by Pope Gregory XIII. The 5th World is now begun.

THE MILITARY INDUSTRIAL COMPLEX

It was the Roman Empire that embedded within the collective world-view the concept that conquest is deemed a civilised behaviour. As Roman civilisation became christianised, the Vatican took hold as the seat of power. It was the Vatican that authorised the torture and execution of untold thousands of human beings in a bid to eradicate matriarchal lineages and censor any scientific investigation of reality that was not geocentric. Charges of heresy and witchcraft were mercilessly carried out. The ancient inheritance of the sciences of zero and Infinity, from Persia, Egypt and beyond, were deemed heretical and under the dominion of the church and were silenced upon pain of death. The weapon of fear proved a great tool of oppression.

The concept of conquest as empire expansion has engendered a belief structure where power is equated as domination. Newtonian science, confined to study only the physics of three dimensions, enabled the ability to precisely target projectiles but limited science to the closed system mechanics of physical domination.

It was the Rothschild family who, in the wars of Napoleonic conquest, recognised the opportunity for profit in war. Funding both sides ensured maximising the profit potential. As fractional reserve banking and usury were already accepted practices, the opportunity of gain was guaranteed.

Human consciousness naturally expands as a process of evolution. We no longer uphold the view that the Earth is the centre of the Universe. The terrain of the entire globe is sliced up as dominion of Nation States. The quest for Empire expansion has become a quest for Global Domination. The same strategies are still being employed. A fractional reserve economy is dependent on debt and unsustainable. The cost of war continues to feed the coffers of the financial elite while poverty is the life reality of the greater majority of the global populace. The tools of fear, guilt, shame and a false sense of National Patriotism ensures docility in those not bound by survival necessity. That this is done under the banner of Freedom and Democracy merely illustrates the fact that these few people still function from the premise; "By whatever means necessary" and have lost all sense of human morality in their disregard for human life. The human 4th World collective reality is one of servility to a Permanent War Economy driven by an oligarchy seeking plutocratic global domination.

The 4th World Human lives in a reality of conformism, control and slavery that is the antithesis of democratic freedom. Human beings have become slaves to a product consciousness and a work ethic that serves a fortified existence.

Corrupt governance is responsible for the deaths of millions of lives throughout history. The patriarch's domination is an appalling fact and indictment of His Story.

Money is given more value than life.

THE MILITARY INDUSTRIAL COMPLEX

The Military Industrial Complex of the 4th world is in a state of entropy. Limited as it is by a science of three dimensions exemplified by the 2nd law of thermodynamics, the 'heat-death' law, which states that all energy within closed systems must come to entropy. Since the advent of nuclear weaponry the capability of Mutually Assured Destruction (MAD) has long been established. The Government of the USA has a 20:20 vision of Full Spectrum Dominance. Trillions of dollars are being spent on the Weaponisation of Space. To what end?

We are witnessing the end games of the 4th World survival. The world is at war to grasp and control dwindling finite resources and secure continuance of something that must, ultimately, by the very laws that define it, end. This creates a potentially volatile and/or violent response to the need for change, as the habituated pattern of 4th World behaviour is to fight to hold on. The possibility of a catastrophic extinction event is very real in these times.

The Thri-Fractal Star Nations Alliance 70% Plan of Planetary Transformation offers the opportunity of transition to the Military Industrial Complex without the requirement of conquering it. This document does not propose revolution, but rather resolution. This change can come about void of any need for further destruction of the human condition. In fact it is restorative and will carry economics forward onto a solid base of a metals backed currency founded on manifest collateral.

5th World Assemblage

GERMINATION, GESTATION AND BIRTH

Processes of collective change are equivalent to processes of personal change. Before anything can change, there must be the awareness and acceptance of the dysfunction that needs to undergo change. This must be followed by the sincere desire for change. In the personal processes of change, to accomplish this the 'basic self' must agree that it will have a better time once the process of change is complete. Similarly with the process and practical application of collective change, it must be clearly seen that through this transition everyone gains.

The seed of the 5th World has germinated and the tap root found anchor. The opportunity available to the human collective now is the transition from a karmic process of life experience to one of dharma. The karmic process of life has been one of learning through pain and separation.

Separation from the source and sanctity of life is the causal root of all pain and suffering. The dharmic reality of the 5th World 'True Human' is one of engaging life as an experience of joy and pleasure for evolutionary growth.

There is everything to gain through acceptance of dharma. This transition from karma to dharma necessitates the requirement for 'Truth Amnesty' and forgiveness, as a human being can not realise a state of dharma with a dual heart.

The Thri-Fractal Star Nations Alliance has diligently laid down the foundations for this transition to occur. The 'Contact Zero Network' has international reach with key contacts established into every aspect of the 70% Plan for Planetary Transformation.

The infrastructure for delivering free energy and resources to where it is needed most is established through Malcolm & Priest Technologies Ltd. for the peaceful transformation of the military industrial complex, and through Green Fibre Communications to nourish the visions of the people. This change is happening.

It is clear that all exchange occurs through relationship. This is true for the exchange of love, as well as for goods, services and money. It is also true in the case of exchanging intelligence. When we break our dependence on fossil fuels and finite science and open ourselves to Infinity and Zero, the realm of a multi-dimensional Universe affords us a much greater field of engagement.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION

The dharmic opportunity of truth amnesty affords the human collective the choice to transcend the dogma and fixed beliefs that are a symptomatic outcome of a closed system mind. It is not ours to judge the folly of sangsara, but rather to hold open the gateway to better choices. The cacophony of calamity that is the 4th World reality is symptomatic of dysfunction in the collective.

The Thri-Fractal Star Nations Alliance and Contact Zero Network are positioned to bring catalytic change to targeted arenas of dysfunction. This transformation begins by accepting the view that the Universe is an infinite open matrix of Holonomic Fractal Intelligence manifesting infinite life forms within infinite diversity and in a continuum of evolution via the life forms it expresses.

To restore resonance in harmonic alignment with this matrix of intelligence is the opportunity of dharma. The arenas of targeted awareness to bring speed to this collective transformation are:

- ◆ **Fractional Reserve Banking and Usury.** Unsustainable economics that demand a populace burdened by indebtedness will transfer to a ZeroPoint Space Age Economy.
- ◆ **Energy Supply and the Petro-Chemical Industry.** Over Unity, Anti Gravity and ZeroPoint technologies deployed to supply unlimited free energy.
- ◆ **Weaponisation of Space.** The Contact Zero Network is directly associated with the Space Preservation Treaty-signing which once implemented will transform military spending, redirecting already established and resourced 'Black Ops.' research programmes to the service of collective wellbeing.
- ◆ **Military Domination.** Military service will become as it always should have been in applying the discipline and precision of dedicated service to Earth (Bio-sphere) and community restoration, liberating resources that can be applied to the R&D of the new technologies.
- ◆ **Industrial and Product Consciousness.** As people are liberated from the burden of debt and taxation, collective value systems will be re-evaluated. Quality and resonance will supercede quantity and possession as fundamentals of value.
- ◆ **Gregorian Timing Standard.** The word 'calendar' is derived from the Roman word 'calends' which refers to the timing of tax collection. The Gregorian calendar, (Vatican, Rome), in use worldwide, upholds this and establishes the belief structure that 'Time is Money'. It is not. Time is 4th dimension. The Natural Timing Standard of the Infinity Codes are now anchored within the collective matrix.

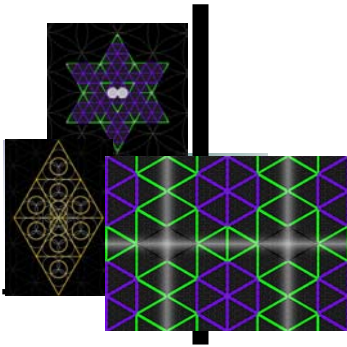

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION

- ◆ **Environmental Contamination and Ecological Balance.** Zero-Point Technology will have a harmonising and equalising effect on environments, while resource will be directed to the urgent task of restoring balance to bio-sphere harmonics. This will include carefully considered strategy for handling nuclear disassembly and waste.
- ◆ **Climate Change.** ZeroPoint technology delivers 'clean' energy and is restorative to ecological balance. Intensive research into the energy—matter/life force—bio-organism interrelationship as the movement of involution/evolution into greater elegance of the expression of Universal Intelligence.
- ◆ **Health Care.** Dedicated in-depth study of the human energy body and physical body relationship in maintenance of resonant health. Inclusion of awareness of the multi-dimensional nature of being as essential to wellbeing.
- ◆ **Pharmaceutical Industry.** Alignment and orientation centres established to facilitate breaking dependencies on anti-depressants and symptom suppressing drugs. Restoration of life value above profit motive.
- ◆ **3rd World Famine and Destitution.** Delivery of free ZeroPoint Technologies will be made available to the poorest regions first in order to enable a fast return to self-sustainability.
- ◆ **Education.** Children will be enriched according to their own growth and their own unique experience of resonant attraction. Schools will become the learning centres of specialist interest, available to all at any time in their life.
- ◆ **Sex Industry.** Restoration of sex as natural, beautiful and sacred. Integration of spiritual sexuality as the cultural expression of the erotic elegance of all life. Restoration of rites of passage to guide children into maturity.
- ◆ **Justice and the Judiciary.** The cause of the scarcity or survival threat will be the subject of investigation rather than a guilt/innocent plea.
- ◆ **Prisons and Penalty.** The concept of punishment will shift to the recognition of the need for re-alignment and healing as opposed to penalty. Centres for the arts of healing and de-conditioning will replace prisons and hospitals.

Thri-Fractal Star Nations Alliance
**70% PLAN FOR PLANETARY
TRANSFORMATION**

The Thri-Fractal Star Nations Alliance 70% Plan for Planetary Transformation is based upon the US Marine Corps Management Principles article 1. **“Aim for the 70% solution.** It is better to decide quickly on an imperfect plan than to roll out a perfect plan when it is too late.”

To not act now is leaving it too late.

Over Unity technology is proven. ZeroPoint technologies are proven at proof of principle. Anti gravitic technologies have been the subject of military black ops since the 1950's. Extra-terrestrial technology has been back engineered. The 'Space Preservation Treaty' pioneered by the 'Institute for Cooperation in Space', the 'Disclosure Project' and the 'Decade of Contact' alongside the proposed 'Truth Amnesty' are perceived as the vehicles of efficient transformation.

The Alchemical quest has been accomplished. Lead can be turned to Alchemical Gold.
The Philosophers Stones have returned to Scotland.

Thri-Fractal Star Nations Alliance

5TH WORLD ASSEMBLAGE

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION

THE PHILOSOPHERS' STONES

“The Philosophers Stone is called the most ancient, secret or unknown, natural, incomprehensible, heavenly, blessed sacred stone of the Sages.

It is described as being true, more certain than certainty itself, the Arcanum of all Arcana—the divine virtue and efficacy, which is hidden from the foolish, the aim and end of all things under heaven, the wonderful epilogue and conclusion of all the labours of the sages—the perfect essence of all the elements, the indestructible body which no element can injure, the quintessence; the double and living mercury which has in itself the heavenly spirit—the cure of all the unsound and imperfect metals—the everlasting light—the panacea for all diseases—the Glorious Phoenix—the most precious of all treasures—the chief good of Nature.”

Anon. The Sophic Hydrolyth (1678)

5th World Assemblage

AN EVOLUTION OF CONSCIOUSNESS

It must be understood that the assemblage of the 5th World is a matter of course as a process of evolution. This has nothing to do with political power, manoeuvring or any form of strategy for national or private gain. What is occurring is a planetary process of increase in the resonant frequency of thought. On the winter solstice of 2012, the sun rises as close as it will come to conjunct Galactic Centre. We have been within the sphere of influence of energy/frequency transmission from the Galactic Source since the mid 1980's. We will remain within that sphere of influence until the mid 2030's. Our choices now will shape how the world looks then. The planet will not return to this direct impact of energy from Galactic Centre for another 5,125 years hence. The 5th World of the True Human is the final 5th of a 26,000 year cycle of the Precession of the Equinoxes. As such it is a culmination of human evolution throughout the previous four 'Worlds'. This is why the 5th World is more commonly known as the 'Golden Age.' The previous worlds of evolution relate to the 'Mu Age', 'Lemurian Age', the 'Age of Atlantis' and this passing age of conquest and domination.

5th World Assemblage does not require defeating the 4th World. The 5th World reality is as different to the 4th World as diamonds are to coal. The 5th World is assembling itself as individual consciousnesses awakened to the increased resonances accessible now as seeding of the frequencies that will be the norm in fully assembled 5th World reality.

The Thri-Fractal Star Nations Alliance 70% Plan for Planetary Transformation is a call to all individuals who recognise the awakening awareness to get behind the vision, stand up and be counted, as dharmic reality demands accountability. To the financial elite and the governments of the world, it offers the opportunity to find the courage to truly assume the mantle of your role. Service to the community and care for the welfare of life in your realm of influence. A truly benevolent and philanthropic expression would ensure that this transformation takes place.

Participate such that democracy may truly be 'from the people, for the people.'

5th World Assemblage

AN ACT OF DETERMINATION

The 70% Plan for Planetary Transformation facilitates the socio-economic transfer of world-views and infrastructure. This can only come about with the acceptance of the fact that this evolution is a dharmic awakening. While dharma evokes the image of spiritual enlightenment, the practicality of dharmic living as a validated life choice is now possible since anchoring the New Timing Standard and Infinity Codes which facilitate a practical awareness of the 'now', aligned with celestial and natural energy expression.

The leaden weight of the scarcity and survival fear of the 4th World exerts a toll of inertia against the willingness to fully assume the Self Authority required to command the choice for a better world. Dharma, as a collective condition of reality is not known to the human being. It is not something that is gifted to an individual. It requires perseverance of determination to have 100% certainty that one's own life expression has integrity.

The 5th World of the True Human will not have an economic of profit motive, but rather the collective care that each individual can be fulfilled.

The 5th World will know a condition of permanent peace, because there will be no need for competition or crime as each individual is supported to contribute their unique gifts in service to the collective environment and requirement.

The 5th World will not experience conflict over fuel, food and resource scarcity because ZeroPoint Technology supplying free energy liberates a massive hoard of resource that can be applied to civil, social and technological advance that is appropriate to a 'Golden Age'.

These three alone abolish the need for fractional reserve banking and usury.

- ◆ **Fractional Reserve Banking and Usury.** Unsustainable economics that demand a populace burdened by indebtedness will transfer to a ZeroPoint Space Age Economy.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The Thri-Fractal Star Nations Alliance through Contact Zero have engaged negotiations at the very highest strata of the current economic hierarchy. Despite promises and good words from some, who present themselves with an 'Earth Restoration' brief, no-one, as yet, has had the courage to be the one to walk their talk and make a difference. At a level of liberating billions of dollars, negotiations continue. Such philanthropic benevolence would initiate and facilitate this transformational plan with ease and liquidity. The sooner liquid resourcing can be delivered to the R&D of new technologies, the sooner certified working devices can be delivered to the global community, enabling swift and environment aligned reconstruction of self-sustaining community aided from the outset by the supply of free energy. The 'Contact Zero Network' has global allied relationships with inventors on the brink of delivering such a ZeroPoint device.

- ♦ **Energy Supply and the Petro-Chemical Industry.** Over unity, Anti Gravity and ZeroPoint technologies deployed to supply unlimited free energy. Because of the very nature of the science of ZeroPoint which extends to a multi-dimensional perspective, no charge will ever be made for the supply of ZeroPoint Energy. There is no threat to the 'oil barons' wealth. Their finite fossil fuel asset is dwindling. As these antiquated technologies decline, the new technologies emerge. The potential for positive engagement in said technologies is vast.

Anti Gravity and Over Unity technologies are already functional and proven. Refinement of delivery will be an on-going process. ZeroPoint Technologies still require intensive investment in R&D. Proof of principle has been accomplished; therefore it can only be a matter of time before a functional device is delivered.

Once a capable device is made ready, it is Malcolm & Priest Technologies Ltd. intent of purpose to present such a device on the world stage. 'Event Zero' will present the device to leading scientists, world leaders, earth restoration pioneers and interested parties at an invitation only conference. This private viewing facilitates an overview of the science and technology. This will be incorporated into a contemporary Science Fair. 'Event Zero' will then present a working device to a global audience via multi-media streaming of a stadium event featuring performers, speakers and earth restoration leaders, with the event entirely powered by ZeroPoint energy itself.

Following 'Event Zero', distribution of working devices will begin in the areas of the third world most in need, to empower self-governed access to clean water, agriculture and self-sustainability.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The Thri-Fractal Star Nations Alliance upholds the view that the ban on weapons in space is one of the primary strategies that will facilitate changing the face of industry, commerce and military strategy globally. The 'Institute for Cooperation in Space' (ICIS), www.peaceinspace.com, founded by Dr. Carol Rosin and Alfred Lambremont Webre, J.D., M.Ed, champions this cause and has placed the Space Preservation Treaty before the governments of this world. The Thri-Fractal Star Nations Alliance hosts the UK office of ICIS.

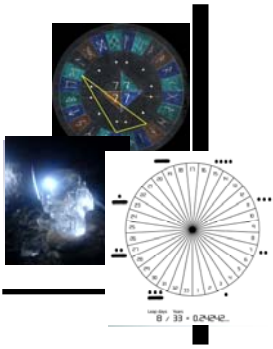

- ◆ **Weaponisation of Space.** The Contact Zero Network is directly associated with the Space Preservation Treaty-signing which once implemented will transform military spending, redirecting already established and resourced 'Black Ops' research programmes to the service of collective wellbeing.

The ICIS vision and mission statement states "ICIS supports global cooperation in the development of a space economy where all the nations of the world can benefit from enhanced communication, shared information, and from the R&D of safe and clean New Energy, space age technology, products and services that can be applied directly to solving urgent and potential global problems such as health, poverty, education, pollution, global warming, sustainable development, environmental degeneration, etc."

The vision statement continues: "Imagine a world where nations join together to advance technologies for utilizing space resources. Imagine a global economy based on cooperative application of space technologies that would benefit all humankind, irrespective of any nation's degree of economic or scientific development. ICIS believes that this vision is not only possible, but inevitable. Humanity is on the threshold of a quantum leap in consciousness and endeavour. We must now take action to preserve this grand opportunity by preventing the Weaponisation of Space.

We have a critical choice – to explore the great unknown of outer space or to risk continued suffering and disasters, devastation or obliteration. We can rise above different perspectives and actions that didn't, don't, and won't cause second order change, actions that recognize our high consciousness and human potential applied with out-of-the-box thinking and intention to cause second order change, or we can continue the status quo of protesting the old and accepting the same that would only lead us to more violence instead of peace. It's our choice, and the time has come to choose and to create the reality we want.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

“We have a Space Preservation Act and a Space Preservation Treaty at the one moment in time when it can be passed into law... to ban all space-based weapons, protect our satellites that we need for verifying the reduction and elimination of missile and nuclear weapons and other dangerous and polluting technologies... as well as for other human and environmental needs. There are leaders who want no weapons in space and who appreciate the benefits and opportunities that can be made available to all by banning space-based weapons. And the time has come to make the choice. We get only one chance in history to make this choice. It is only our generation’s responsibility to preserve space as a weapon-free zone.”

The Thri-Fractal Star Nations Alliance already has relationship and agreements with ‘Star Nation Peoples’ from the star systems of Orion, Sirius, The Pleiades and Arcturus. Psi Ops have been conducted beyond the bounds of Earth Quarantine. These Star Nation People are available to us with willingness to conduct Intelligence Transfer re. advanced technologies. To date contact has been established in 5th dimensional context. At the present time agreement is still being sought for 3rd dimensional ‘First Contact’. The situation remains that the people of Earth still need to transcend their tendency towards violence and aggression before such contact or intelligence transfer can move forward, although progress is being made with the latter.

The human race can continue to choose separation at a global and Galactic/Universal level. However, it has already been stated that separation is a karmic choice.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The evolution taking place is one of increase in the frequency and quality of thought, where thought is understood as the perceptual cognition through interaction with energy within any given space. This is not a question of right/wrong thinking or behaviour. It is rather recognition of the fact that we exist in a Universe of energy frequencies and that the human being is quite 'low' on the scale of resonances existing within that Universe. As such, universal energy has a 'higher' frequency of resonance than the average human being can cognitively perceive and translate. This is changing. The evolution is one of electro-magnetic resonance with direct impact into the psychic/kinetic energies of all of Humanity. The increase of frequency is not avoidable as a human being is an electro-magnetic/psychic-kinetic energy space within which the physical body exists. In view of this awakening paradigm it is apparent that war is a low frequency resonance strategy of conflict resolution. There are strategies of conflict resolution that transcend the disregard for life that war entails.

- ◆ **Military Domination.** Military service will become as it always should have been in applying the discipline and precision of dedicated service to Earth (Bio-sphere) and community restoration liberating resources that can be applied to the R&D of the new technologies.

Wars are manufactured for profit. It has been the strategy of the worlds financial elite to fund both sides of a war to maximise profit for themselves. Dubious engagements and deals are rife in the history of every war fought over the past two centuries. How many lives have been lost such that these men may profit and further their goal of global domination? It is difficult to stretch the imagination to consider the amount of money spent globally on military and militia ends. Should this measure of investment be delivered to life enhancing action, as opposed to our ability to kill others, we would see the world transform overnight.

“The real truth of the matter is, as you and I know,
that a financial element in the larger centres
has owned the government since the days
of Andrew Jackson.”

“In politics nothing happens by accident;
if it happens, you can be sure
We planned it that way.”

President Franklin Roosevelt.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

With the advent of Information Technologies and the internet, cultures are no longer separated by geographical location. Religions are no longer defined by geographical terrain. Yet how many wars are initiated over religious differences and cultural misunderstanding? The current instability in the middle east, a situation created by western governments, is a reflection of the age old conflict between Christianity and Islam. The Knights Templar, through relationship with Persian scholars were custodians to the ancient knowledge of infinity. The Knights Templar themselves were condemned as heretic, until charges against them were rerieved on 11th October 2007 following Thri Fractal action to liberate the Sacred Symbols of Alchemy on 10th October 2007.

Ultimately we must ascend to celebrate our cultural differences and the diversity of the expression that creates culture. Since the end of the 'Cold War' the bi-polar politic of communism vs. conservatism has clearly had its day, and yet the conservative west still attempts to uphold its values as superior and applicable to all. In their own words, "You are either with us or against us", and thus condemned a terrorist. This attitude is blind nonsense. It is a blindness to the truth of polarity. The prerequisite of 3rd dimensional expression that fundamentally underpins all manifest forms. This blindness closes out the possibility to recognise polarity as complimentary opposites and defines reality within dogmatic moralities of good/bad, correct/incorrect, with us/against us, win/lose. And yet the complimentary nature of polarisation is right before us in every 24hr cycle. Day/Night. Attitudes of good/bad close out access to higher dimensional frequencies.

Openness, transparency, sharing of Knowledge and Wisdom will be the key note of the 5th World. Significant work has already been undertaken to discharge the grip on 'Mystery School Teachings', such that the esoteric (inner) and occult (outer) expressions of unseen energy in motion can be understood in a life positive, creative context unshackled from the fear and superstition created by those who would seek to keep such knowledge for their personal ends.

- ◆ **Industrial and Product Consciousness.** As people are liberated from the burden of debt and taxation, value systems will be re-evaluated. Quality and resonance will supercede quantity and possession as fundamentals of value.

Industrialisation has grown from military development. It has been and still is the case that the majority of technical advance has developed from military research, with one aim in mind, to be better able to conquer our neighbours. This ethos carries across most arenas of advance including medical/pharmaceutical, bio-engineering and transport, etc. Inevitably, this primary focus is destructive to life.

Once militarization has been accomplished, the technology will be productised and fed into the consumerist market. The science upon which research and development is undertaken is bound by the limitation of three dimensions. Within such limitation the resultant technology can only be framed within the construct of mastery or domination of the material plane, or matter.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

Science, restricted to the study of matter could only create technologies dependent on the finite resources of the Planetary realm of matter. Our technologies are incredible, but at what cost? We have brought the material plane of this planet to its knees. Thousands of species have become extinct, never to be known on this planet again, because of the Human blindness to the affect of our wants. Pollution is at a critical level and yet we continue to use fossil fuels as if there is no tomorrow. If we sustain this behaviour, there will be no tomorrow for our children.

Industrialisation created the opportunity to create wealth. Something we naturally all desire. Wealth is made possible through profit motive sales. The Thri Fractal Star Nations Alliance does not intend to point fingers of blame. These have been natural processes of development within the context of history, as we know it. However, it is clearly evident that the human collective is in gross dysfunction and so the intent is to highlight the causal roots of this dysfunction.

'Product Consciousness' has overwhelmed the markets of commerce. It no longer matters if the product fulfils a collective need, it only matters if the marketeer can make a sale and there are no moral codes to that end. The use of media to manipulate the collective with regard to its needs has reached unprecedented levels. The market place is swamped with low quality merchandise (normally plastics) and throw away convenience items. Products are manufactured with built in obsolescence to ensure further sales. Even our world leaders go to election under multi-million dollar marketing campaigns. All of this through the manipulation of matter, which matters to Planet Earth.

'Product Consciousness' has created a situation where manufacture is divorced from any sense of aesthetic value and separation from such value undermines morality until it is acceptable for other human beings to give their entire lives at a wage level below the poverty line, where children will be forced to work below minimum wage. It has created a cultural pattern that establishes addictive need patterns and then feeds them with absolute disregard for human life, creating black markets such as human trafficking, displacement of cultures, child prostitution, etc. It also manages a drugs market to numb us from the pain of it. However attractive we may consider our shiny city centre edifices to this economic model, there is next to no beauty in it. This scenario is ugly enough, then apply fractional reserve banking, our current economic standard which is dependent on debt, and usury and you have a population crippled by wage slavery and interest rates that ensure that the people will never rise above their debts. Slavery did not end in 1807, it just changed its face.

The 'Federal Reserve' creates and issues money in the USA. Federal Reserve notes are not worth the paper they are printed on because there is nothing whatsoever backing the money such as Silver and Gold. The Federal Reserve Bank is not owned by the US government. It is a privately owned business. The US Government receives its money from the Federal Reserve and with it an interest rate that assures continued national debt. A similar situation is manifest in the UK where The Bank of England is also a private business.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

"Allow me to issue and control
the money of a nation, and I care
not who writes the laws."

-Mayer Amschel Rothschild 1828

War, debt and profit motive (creating product consciousness) are the mainstay of the current collective reality. Under these conditions only a very limited few can prosper. Once resources are relieved from the technologies of killing our ability of mind and skill in study will deliver life enhancing technologies beyond the scope of our current imagination. At the beginning of the 20th Century it was thought impossible to set a machine in the air. Global air travel has now become common place. At that time, human consciousness thought that the extreme of our Galaxy was the extent of the Universe. Over the last one hundred years, evolution has accelerated at a pace that our awareness has not kept up with. Implementation of the 70% Plan for Planetary Transformation will redress this situation.

Fractal mathematics have proven infinity. The Hubble Telescope has enabled our view of deep space where we find Galaxies upon Galaxies in undefined measure. The thought patterns expressed above arose from a spiritual worldview that the Earth is the Centre of the Universe. We now know that the Earth exists in a small spiral arm of our Galaxy, that our Earth moves around the Sun and our whole Solar System moves around Galactic Centre. It really is time that we re-evaluated our world-view in line with our greater understanding.

All ancient cultures measured time in relation to the observable movements of Sun, Moon and Stars, and yet our current socio-economic / business and world timing standard is based on an arbitrary division of the year formed by Pope Gregory XIII, at the time when we thought that the Earth was the centre of the Universe.

- ♦ **Gregorian Timing Standard.** The word 'calendar' is derived from the Roman word 'calends' which refers to timing of tax collection. The Gregorian calendar, (Vatican, Rome), upholds this and establishes the belief structure that 'Time is Money'. It is not. Time is 4th dimension. The Natural Timing Standard of the Infinity Codes are now anchored within the collective matrix.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The Gregorian Calendar is a timing standard of unequal measure. No other device of measure with unequal units would be accepted or functional in any other context. How is it that we as a collective accept a timing standard that bears no relation whatsoever to the movement of the planet within space? The Gregorian calendar furthers the divide between humanity and creation. It is a tool of separation that doesn't even maintain great accuracy. The four year leap-day sequence is appallingly clumsy, particularly when set against the accuracy of time/space measure of our ancient ancestors as reflected in the leap day sequencing of the ancient Persian culture, or the monument of Stonehenge in the UK.

Through close study of the movements of the Planets, the cycles of the year and the backdrop of the 'fixed stars' and accompanied by the accuracy of star mapping software such as 'StarCalc', a natural timing standard is clearly evident in a 28 day lunar time calibration. Not only is this far more accurate than the current timing standard, but it opens the doorway to an incredible array of timing matrices. These matrices map the cycles of the planets of our Solar System and extend beyond to the greater cosm. Accuracy of timing calibration can be maintained over thousands of years. Study of these patterns has revealed what can only be called the 'Infinity Codes'. The work of Dr. Raah Sirus Hun Kuk'um has delved with incredible precision into these 'infinity codes'. This work translates the 'language of the Universe', the science of number, pattern and sequence. This profound study connects consciousness with the harmonics of creation.

The 'Infinity Codes' reveal a non-mechanical and yet consistent pattern to the movement of energy within creation. Timing frequencies and harmonics have been mapped over several thousand years and proven to be true. All of the different cycles manifest in the movement of planets and stars code into repeating harmonics and resonances and they all interlock and interconnect within a matrix that is the pure energy expression of creation as it manifests itself. These number codes are incredibly significant because of the very fact that they reveal the harmonics that underlie all of creation. Not only do the infinity codes lay the frame for an accurate and connected timing standard, but they reveal the inter-relatedness of Universal manifestation.

This is a comparatively young study, and yet it is already sensed that these coding harmonics may well hold the key to delivering ZeroPoint technologies, as the goal of such research is to access the energy held within the 'ether' or void. The Infinity Codes show the harmonics by which matter manifests from the void, and it is clearly Universal.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

This understanding, that all matter (approximately 8% of the energy available in the Universe) manifests from a pure expression of energy-in-motion is fundamental to all current scientific advancement. The contemporary sciences are perceiving this and yet still we can only draw energy from matter. This is true in every respect. It is an absolute imperative that we transcend our dependence on fossil fuels and yet any real solutions or alternatives continue to be hindered through the vested interests of those who profit from oil.

It is a perverse reflection of the power of media that the people are sold 'feel good' incentives and given to concern over individual 'carbon footprints'. This is an appalling continuance of hoodwinking the people. It will not bring solution. Neither will wind or hydro power deliver solution to the global energy crisis. Technologies that can access the 92% of Universal energy held within the void are established at proof of principle. It is delusional insanity to block these technologies from development and implementation. These technologies are clean—non-polluting. In fact it is predicted that they will have a restorative effect in neutralising environmental contamination.

- ◆ **Environmental Contamination and Ecological Balance.** Once operative, ZeroPoint Technology will have a harmonising and equalising effect on natural environments. Resource will be directed to the urgent task of restoring balance to bio-sphere harmonics. This will include carefully considered strategy for handling nuclear disassembly and waste.

It is no longer acceptable that the Human Race continue on its recent/current course. There are already large tracts of ocean water that are essentially dead. Natural clean water is comparatively scarce. We have sucked the fossil fuels from the Earth, we have blasted and raped the body of this planet. We have polluted, damaged and corrupted the atmosphere, the very air we breathe. Collectively we know this is true and yet we continue to decimate rain forests, drive our combustion engines and maintain our industries. All for the sake of money and profit. Is it any wonder we find ourselves in quarantine in relation to the greater Galactic Community. Our behaviour is insane. Human beings, in their current modality, are a danger to all life.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The Infinity Codes demonstrate the inter-connected, inter-reliable and inter-dependent nature of all things within the Infinite Universe. They demonstrate that all matter is manifest within the harmonics and frequency resonance of pure fractal dynamics. That the Universe is a continuum of infinite time and infinite space that sustains itself through harmonic dynamics of relationship is proven. Our culture is actively engaged to maintain separation. Our calendar ensures our disconnection. Our work ethic keeps us imprisoned in scarcity and survival fear. Fear, shame, guilt, debt, doubt, resentment, powerlessness, are all strategies that our 'authorities' use to keep us removed from our Self Authority.

- ◆ **Climate Change.** ZeroPoint technology delivers 'clean' energy and is restorative to ecological balance. Intensive research into the energy—matter/life force—bio-organism interrelationship as the movement of involution/evolution into greater elegance of the expression of Universal Intelligence.

Everything within infinite creation is connected. Our spiritual traditions all relate the adage 'As Above/So Below'. This is so, and experientable from a place of connection. Yet in our arrogance we placate ourselves with the idea that the 'As Above' must be in equal dysfunction to our 'So Below'. Not So. If we opened ourselves to our multi-dimensional nature, we would swiftly re-align with the harmonic frequency resonances of the fractal dynamics of the 'As Above'. Our 'So Below' is being destroyed because we separate from the 'As Above'. Every effort and every resource must be made available to restore our connectedness with Galactic/Cosmic/Universal energy, how it interfaces with the realm of matter and how we can utilise this understanding in order to create sustainable realities that are aligned with the energy movement of all other natural forms of creation.

The connected, energy sensitive perception of a Human Being, awake, aware and attentive to how energy is moving in creation, is in a state of naturalness and this is the state that the human being will wake up to in the full assemblage of the 5th World.

- ◆ **Health Care.** Dedicated study of the human energy body and physical body relationship in maintenance of resonant health. Inclusion of awareness of the multi-dimensional nature of being as essential to wellbeing.

Obviously this change of world-view will have massive implications with regard to health care. All the symptoms of dysfunction referenced in this document rob the human being of life force energy. Stress, anxiety and a sense of powerlessness are perhaps the worst causes of energy loss. Our 4th World mode of living costs us more energy than we get back from our life expression. This is the antithesis and reversal of the concept of over-unity and is directly related to poor health and premature death. With consciousness, morality free of rules and laws, and a life attitude that embraces aesthetic, we can reverse this such that our engagement in life benefits both health and longevity.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

This is, in essence, the shift from karma to dharma. Karma equates to suffering and energy loss. Dharma entails an orientation to pleasure and quality that creates energy gain. This is the basis of all 'alternative' bona fide healing practices. To identify where we lose energy through dysfunction and self-responsibly take care to change the root behaviour. This must now be applied to our collective dysfunction.

- ◆ **Pharmaceutical Industry.** Alignment and orientation centres established to facilitate breaking dependencies on anti-depressants and symptom suppressing drugs.

The whole attitude and approach to wellbeing will transform. Our current drug and medical industries function to treat symptoms by removal or suppression. This does not cure dysfunction. With the widespread acceptance of the practices of alchemy and its applications for healing, the face of health care will change. Dysfunction at all levels must be addressed at cause.

Dysfunctional patterns accrue matter following the same energy laws that guide all forms of manifestation. Dysfunctional patterns attract dissonant expressions in the same way as aesthetic patterns will attract resonant forms. An honest assessment of the expression of our human aspects, emotion, thought, physical, spiritual and sexual, born in relation to creations expression of the elements, water, air, earth, fire and void will carry the human being forward in their process of aligning with the energy movement of the Infinite Fractal Matrix of Universal Energy.

As connection is restored, the higher frequency energy of Universal Creation will re-align the human matrix through laws of pure energy resonance. Increased resonance is the awakening that is occurring as the human evolution of consciousness that is the birthing of the 5th World.

For the individual there is the recognition that through connection, relationship is established and that it is through relationship that energy transference takes place. This activates the awareness that the higher frequency energy of creation is, in fact, higher frequency intelligence.

Intelligence that expresses as resonance and is woven through symbol into matter via the 4th dimensional ordering of time.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

As recognition of the higher frequency intelligence of creation dawns, many of the dysfunctional patterns of 4th World human behaviour are seen for what they are and become abhorrent to the higher frequency resonance being integrated through energy interaction with a greater sphere than only the three dimensions of the physical world.

- ◆ **3rd World Famine and Destitution.** Delivery of free ZeroPoint Technologies will be made available to the poorest regions first in order to enable a fast return to self-sustainability.

That any child should die of starvation is simply not acceptable.

- ◆ **Education.** Children will be enriched according to their own growth and their own unique experience of resonant attraction. Schools will become the learning centres of specialist interest, available to all at any time in their life.

The language of the Universe may well be mathematics, but its voice is symbol.

Everything that is known to human beings is formed through symbol. Contemporary science has arrived at the awareness that all that there is, is energy. The Human Being is an energy—light—being, an energy space in interaction with all other energies that connect with that space. All of the human senses receive input stimulus from the surrounding environment. This includes the faculties of human 'ESP' (energy sensitive perception). It is via these senses that we make sense of the world. All of the input stimulus is processed via the neural pathways of the brain. According to collectively agreed definitions, resonance is identified, interpreted and experienced as perception. It is our collectively agreed symbol structure that establishes the appearance of matter. This is known as an 'energetic uniformity cohesive contract'. It is a collective agreement to perceive the world in a particular way. This agreement is deeply rooted into ancestral inheritance and is coded within the DNA, RNA matrix.

All intelligence, and thus knowledge transfer happens through connection, merging and interaction or energy interface. The blossoming of a Human Soul is a process of life and evolution. Learning is a natural process of growing. It is the whole community that pass on the collective 'description of the world' to the child. The quality and nature of the description is the responsibility of the adult collective/community. There is nothing within human experience that is not conveyed via this process. It is a process that shapes the physical matter of reality. The quality of manifestations in the perceived world is shaped by collective care. Any integral connection with life through the natural matrix of creation energy affirms intimacy. Intimacy fosters care.

Education will care to enable the child to make sense of the world by introducing the child to relationship with all forms of matter within its environment, mineral, plant, animal and human. It will open relationship with the energy reality of the 'spirit' of things as well as the unseen realms of ancestral spirits.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

From birth until death the process of maturational development will be honoured through the re-introduction of 'Rites of Passage'. From birth until puberty the primary focus will be enrichment of individuality within the environment and community. A child's enrichment will be nurtured through relationship within a context of 'extended family', where community is the basis rather than blood. In such a context the care of the community will be to identify the uniqueness of the child as they develop and to then enrich the child accordingly with resources and knowledge related to the child's natural curiosity, abilities, talents and skills.

Schooling will be transformed into life learning facilities. Schools will become centres of learning, open to the whole community at any stage of their life, such that learning can be undertaken in alignment with desire to know.

The understanding of the 'True Nature' of our humanness will be of primary value in the conscious assemblage of the 5th World reality. The multi-dimensional nature of our unique individual energy matrix allows an expansion of awareness of the nature of 'knowing' and 'being'. Since the groundbreaking research of Dr Roy Malcolm {Malcolm and Priest Technologies Ltd} in his thesis "Modulation of Muscarinic Receptors in the Brain" and subsequent scientific papers, it is known that the concentration of neurotransmitter receptors in the brain, which reflects sensitivity of the system, responds rapidly to small changes in the activity of the neuroreceptors and the DNA/RNA coding for protein synthesis. The brain neurological system is very sensitive. He also clearly demonstrated that the differences in concentration of the muscarinic type of neuroreceptors in the temporal cortex, [an area of the brain associated with memory and learning] is correlated with reported differences in the learning ability or intelligences of animals studied.

Double Helix of DNA

As with zero point energy, where the ether, or void, accounts for 92% + of the existent energy within the Universe, it is also so that so called 'junk', or rather 'latent', DNA coding accounts for a similar percentage of the DNA structuring. That the activity of cell membrane neuroreceptors influences protein synthesis as transmitted by mRNA is profoundly significant when considering that body chemistry changes rapidly in direct response to emotive quality of experience. The body chemistry is radically different under conditions of stress than under conditions of pleasure. This indicates that the capacity for rapid change in collective reality is possible when steps as outlined here are accomplished.

The processes of energy transfer from pure energy into matter are directly related to both the auric and DNA function in assembling reality.

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The consciousness of life as a bio-energetic feedback process of evolution transforms the attitude towards all that impacts the quality of experience. It is recognised that both ancestral inheritance, as habituated receptor habits creating repetition in quality of experience, along with forward visioning and the anticipation of fruitful actualisation, dramatically impact body chemistry. These aspects combine in interaction with the Universal/Cosmic/Galactic/Solar/Earth/Culture/Community/Home energetic that exists in the moment and all three determine the receptor activity at the cell membrane. The maturation process of life experience will alter ancestral coding as evolution. Imagination and liberty hold the keys to a hopeful future development. Being present with consciousness to the quality and frequency of energy in the moment facilitates acuity of receptivity to infinities intent as expressed in the multi-dimensional flux of the moment. Infinities intent is the intelligence of the Universal energy of chaos. It is free energy in motion that has qualitative frequency and resonance, or thought. The current human collective transformation taking place is an evolution of consciousness. i.e. we become aware.

The DNA coding functions as binary coding. Everything that exists in the manifest is within this polarised expression. This is true for all life forms on Earth and is reflected in gender. In the human being it is imperative that an appropriate understanding of female/male differences, driven by genetic coding, be clarified. The 4th World belief pattern has been patriarchal dominant. This attitude is not resonant with 5th World dynamics. Gender confusion and conflict are compounded by belief structures that create guilt and shame. The union of female and male energy creates life. Sexual taboo inhibits life. Life force is sexual and creative. Sexual suppression and dysfunction underlie many of the symptoms of 4th World entropy.

- ♦ **Sex Industry.** Restoration of sex as natural, beautiful and sacred. Integration of spiritual sexuality as the cultural expression of the erotic elegance of life with temples of training and practice for specialist interest or acumen. Restoration of rites of passage to guide children into maturity.

Appropriate understanding of female/male differences and sexuality will be conveyed at puberty rites of passage. The inability to integrate sexuality with maturity creates energy patterns whereby adults continue to function from child motivations. This causes attitudes of self-focus and separation. In puberty rites of passage, each gender is instructed by the same gender. Proper sexual instruction requires an understanding of the energy body when sexual union is understood as 'merging'. The flow of life force in the body realised through sexually uninhibited and conscious engaging is wholly life and health positive. This appreciation of the energy union is natural yet is commonly referred to as 'spiritual sexuality'.

The assemblage of the 5th World is a liberation process. As such, when released, all the frequencies that have been suppressed will seek expression. This is demonstrated in the advent of the internet as an anarchic system of communication.

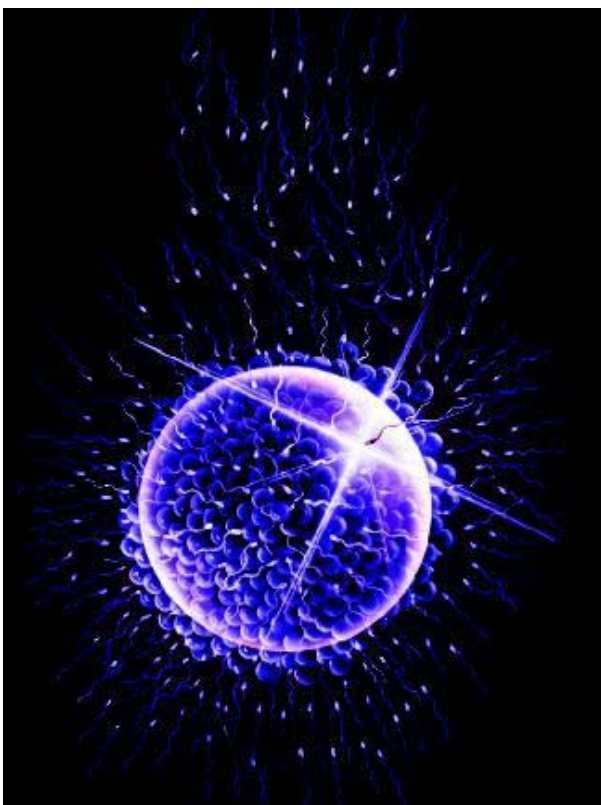

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

The Thri-Fractal Star Nations Alliance holds firm to principles of non-denial and non-censorship. The facilities that will become centres of study and practice will initially hold the space for releasing, healing and transforming low frequency sexual resonances through safe and intimate environments where desires may be explored, thus clearly identifying the qualitative resonance for what it is and being able to assist the individual involved to experience a higher frequency resonance related to the motivational drive underlying dysfunction, enabling transformation as a process of desire.

Guilt, shame and fear are the primary energies of a product consciousness attitude towards sex that has manifest as a sex industry. It is also a primary feed to the debt based credit economy. Product consciousness applied to sexuality creates a frequency of expression that causes addictive behaviours and energy loss through low level orgasm as release. This is detrimental to life and health and the anti-thesis of life generative sex.

The Thri-Fractal Star Nations Alliance will act to liberate those involved in the sex industry as victims, either by force or by force of conditions (poverty), or against their will in any way. Moral standards will be established in accord with Sacred Law. The honouring of the womb of woman as the cauldron of life and that nothing shall be done to harm the children will be fundamental. Transgression will not be treated either with penalty or punishment, but with appropriate healing and integration of balance.

“I believe that fundamentally they are (Jesus Christ and Mary Magdalene) an archetype for the marrying of male and female energy, which is literally the superconductor to create a resonant zero point device, based on the infinite principle of a woman’s womb. Because creation happens in that moment... ..The exact moment when the sperm enters the ovum, the egg, the precise moment of exchange. That’s zero point.”

Eliahi Priest, Day Outside of Time
25th July 2007.
Edinburgh

Thri-Fractal Star Nations Alliance

70% PLAN FOR PLANETARY TRANSFORMATION IN ACTION

In all aspects of human nature, while still honouring the individual right of privacy, as soon as there is a felt need to hide any behaviour or motive the individual loses one-heartedness and thus transparency. Transparency is an integral aspect of 5th World 'True Humanness' and is the root of intimacy. Intimacy is being 'in openness with'. It is to be at ease in allowing another to experience the entire energy matrix of your being, as it is. This Just Is—Justice.

- ◆ **Justice and the Judiciary.** The cause of the scarcity or survival threat will be the subject of investigation rather than a guilt / innocent plea.

The call to 'Truth Amnesty', as demonstrated in the cessation of apartheid, is one of the primary keys of the Thri-Fractal Star Nations 70% Plan for Planetary Transformation. The opportunity to be accountable for ones actions facilitates a return to one-heartedness and re-integration into the Greater Universal Matrix of the intelligence of infinities intent and the possibility of Soul Dream Fulfilment. The measure of Soul fulfilment is equivalent to the measure of integrated connectedness. A sense of separation is evident in all aspects of desperation at all levels. Stepping outside of Sacred Law can only occur in desperation and separation.

4th World morality has been established outside of the harmonising quality of female/male balance. This has created a belief structure based on right/wrong, good/bad polarisation. This belief structure denies polarity as complimentary and blocks access to ancestral memory.

The Thri-Fractal Star Nations Alliance have access to the 1st Nation Peoples of Turtle Island and the inheritance of a surviving lineage. A working model of a 'Council of Law' is applicable in all situations of seeking understanding of the energy dynamics that are operative behind any expression of dysfunction.

Expressions of dysfunction will be embraced as pleas of desperation and appropriate re-balancing and integration will be then be delivered in order to restore balance within the individual and integrity in relationship with the holistic world-view.

Thri-Fractal Star Nations Alliance
**70% PLAN FOR PLANETARY
TRANSFORMATION IN ACTION**

- ◆ **Prisons and Penalty.** The concept of punishment will shift to the recognition of the need for re-alignment and healing as opposed to penalty. Centres for the arts of healing and deconditioning will replace hospitals and prisons.

The Thri-Fractal Star Nations Alliance 70% Plan for Planetary Transformation establishes a framework whereby the transmigration from the 4th World into the 5th World, or, 'The Return to the Garden', can be undertaken without fear. No one will lose. All will gain. No one will have their wealth removed from them. The economy need not be threatened or destabilised. Industry opportunities in new fields of development will be plentiful. Resources will be re-directed to facilitate the elimination of poverty. All will be honoured with the opportunity to be themselves.

THE THRI-FRACTAL STAR NATIONS ALLIANCE

As transformation of the military industrial complex unfolds, life quality of the people will increase through liberation from the stress of survival mode living exerted upon them through excessive taxation and corrupt governance. As the financial streams are re-directed to 'life positive' initiatives, environments conducive to harmonisation with creation will naturally emerge.

The Natural Timing Standards are anchored and understandable through celestial events. The Quarters of the year will be celebrated as tidal nodes of the ebb and flow of the growth cycles of the year, rather than locked to the calculation of profit/loss and strategy targeting. The non-cardinal markers celebrated as the maximised exchange dynamics of the interface of energy and matter understood through Fibonacci coding interfacing with binary fractal process codes. The Natural Timing Standards anchor these points in direct relation to actual and observable celestial events. These anchor points are already held in collective memory and ancestral mythology. Life energy moving as chaos functions within a principle of +1 increment and thus remains non-mechanical. Collective mythologies from all cultures will be studied, with appropriate theological representation, and will be re-calibrated such that all definitive understanding will be based on empirical recognition of life processes taking place rather than belief system.

Primary paired bonding is natural to human's although the insular family unit is an outcome of fortress consciousness. Family structures will open up as people become liberated from the bonds of wage slavery. In such an environment the nature and expression of culture will change radically. The integration of time as the 4th dimension becomes an abundant source of inspiration and joy in witnessing the majesty of synchronicity as infinities intent unfolds. Becoming multi-dimensionally aware establishes the human as a bridge between the higher dimensions and the three dimensions of the physical realm, empowering a true recognition and understanding of the Human Being as co-creator with the life matrix. Infinities Intent moves through human yearning. Education serves fulfilment.

Abundance will be directed to scientific research that seeks understanding of the energy laws guiding the movement of energy into substance. This understanding underlies all physical manifestation. The physical body is the physically manifest aspect of our overall humanness. The research and development of a new medical and healing practice will quickly develop alongside the decrease in manifest symptoms as the human energetic re-aligns with creation/life energy.

Understanding Humanness as an energy-light-body will become fundamental in the re-integration of the people into the awareness of the nature and gain of living in energy resonance with life and creation as a participatory relationship of evolutionary co-creation. As re-integration takes place the experience of life as a maturational growth process is then integrated at every level such that the celebrations honouring a grandparent are of equal import as those celebrating childhood.

THE THRI-FRACTAL STAR NATIONS ALLIANCE

Clearly, as new sciences, new technologies and new cultural environments emerge new arenas of understanding will be integrated into educational curricular. The enrichment of a child in early life will facilitate an energy sensitive perceptual awareness of Self within the environment and in relationship, merging and exchange.

As the collective awareness is empowered to open to a multi-dimensional awareness of life and reality and the consciousness that all exchange occurs through connection, relationship and merging is integrated, the self-focussed attitudes of competition, taking, and getting away with what you can in order to gain for self and fortified family will be transcended. As this occurs, the fear of chaos can be released such that chaos can be understood as the nature and expression of life force energy in free motion. Fractal mathematics is the language of chaos and its expressions are elegant and beautiful.

Love is the resonant frequency of life force energy in free expression. In liberating the people from the stress, fear, shame, guilt, oppression and suppression of the contemporary manner of life experience, love, as life force, facilitates the individual to experience presence with the experience of love from within self. In the infinite now of being, this is the validation of all spiritual and religious traditions.

The Thri-Fractal Star Nations Alliance 70% Plan of Planetary Transformation is established within 5th World frequencies of actualised, validated and empirically evidenced actuality of the principles expressed here.

The Contact Zero Network is primed and prepared to initiate these strategies as global modalities for transcending the 4th World entropy.

Green Fibre Communications is established to facilitate autonomous and empowering strategies to renew the peoples belief in their own dreams. It is also established to facilitate the distribution of abundance to serve fulfilment of the aspirations of the people.

The Thri-Fractal Star Nations Alliance continues to develop and facilitate relationship with the greater 'Galactic'/'Cosmic' community.

This transformation is not only possible, it is over-due.

DR. CAROL ROSIN

INSTITUTE FOR COOPERATION IN SPACE (ICIS)

Dr. Carol Rosin is an award-winning educator, author, leading aerospace executive and space and missile defence consultant. She is a former spokesperson for Werner von Braun and has consulted to a number of companies, organizations, government departments and the intelligence community. She is the current President of the Institute for Cooperation in Space (ICIS) Dr. Rosin has received the support of various prominent individuals such as U.S. Congressman Dennis Kucinich, a former Presidential Candidate, and Hon. Paul Hellyer, a former Canadian Minister of National Defence.

Dr. Rosin was the first woman to hold the position of Corporate Manager at Fairchild Industries from 1974 through 1977, where she met the late Dr. Werner von Braun. When they first met in early 1974, Von Braun was dying of cancer. Von Braun spent the last years of his life, his dying years, educating and mentoring Dr. Rosin about why space-based weapons are dangerous, destabilizing, too costly, unnecessary, unworkable and about the available alternatives. He asked Dr. Rosin to be his spokesperson and to appear on occasions when he was too ill to speak. He asked her to take on the challenge of promoting the ban of space weapons by educating decision makers and the grassroots about transforming the military industrial complex into a peaceful space exploration industry.

Dr. Rosin has been a consultant to corporations and organizations, including TRW, Disney, GE, IBM and the National Space Institute on space and defence. She has testified before the U.S. Congress, the U.S. Senate, the President's Commission on Space and has met with people in over 100 countries about the feasibility of banning space-based weapons.

Dr. Rosin is the recipient of the United Societies in Space Humanitarian Award for 30 years of dedication, a Science Teachers Gold Medal Award, an Aviation Writers Award and an American Society of Engineering Educators Award for organizing the motivation program "It's Your Turn" for youth, women and minorities.

She is the founder and former director of the Institute for Security and Cooperation in Outer Space (ISCOS) an NGO in consultative status with the United Nations Economic and Social Council (UN-ECOSOC).

She co-founded the Institute for Cooperation in Space (ICIS) in 2001 and is the current President. ICIS board members include former astronauts Edgar Mitchell & Dr. Brian O'Leary, as well as Arthur C. Clarke, former ambassador James George, General Council Daniel Sheehan and a founder of International Earth Day (March 21st), John McConnell.

ALFRED LAMBREMONT WEBRE

Alfred Lambremont Webre, J.D., M.Ed. is an author, lawyer (member of the District of Columbia Bar), futurist, peace activist, environmental activist, and a space activist who promotes the ban of space weapons. He was a co-architect of the Space Preservation Treaty and the Space Preservation Act that was introduced to the U.S. Congress by Congressman Dennis Kucinich and is endorsed by more than 270 NGO's worldwide. He helped draft the Citizen Hearing in 2000 with Stephen Bassett and serves as a member of the Board of Advisors. Mr. Webre is also on the Board of Advisers at the Exopolitics Institute, is the congressional coordinator for The Disclosure Project, is a judge on the Kuala Lumpur War Crimes Tribunal, and is the International Director of the Institute for Cooperation in Space.

Alfred Lambremont Webre became an associate with Cleary, Gottlieb, Steen & Hamilton, in New York City, in 1968. His responsibilities were international finance, tax, and litigation practice for investment banking, corporate, and public sector clients. In 1970, he joined the New York City Environmental Protection Administration as the General Counsel and Assistant Administrator. He designed and enforced environmental standards for air, water, noise pollution, and solid waste management. In 1973, he went to work as a consultant for the Ford Foundation's Public Interest Environmental Law Program in New York City. He was in charge of evaluation and program recommendations in public interest environmental law program for grantees including Natural Resources Defence Council and Environmental Defence Fund. In 1977, he joined Stanford Research Institute (SRI International) in Menlo Park, California, as a futurist for the Centre for the Study of Social Policy. His responsibilities were the studies in alternative futures, innovation diffusion, and social policy applications for clients including the Carter White House Extraterrestrial Communications Study, the National Science Foundation, U.S. Congress (Office of Technology Assessment), the U.S. Department of Energy, and the State of California (Energy Plan).

He was a member of the Governor's Emergency Taskforce on Earthquake Preparedness for the state of California between 1980 & 1982. Between 1982-1987, he was a Non Governmental Organization (NGO) Delegate at the United Nations in New York. He was involved with the Communications Coordination Committee for the United Nations, with the UNISPACE Outer Space Conference (Vienna) and involved with the United Nations Second Special Session on Disarmament. In 1983, Mr. Webre joined the New York State Legislative Institute as Senior Fellow. He spent time on issues of public policy studies and legislative initiatives for the New York State legislature as well as the development of Graduate School of Political Management.

ALFRED LAMBREMONT WEBRE

In 1986, he became President of Legal Access Worldwide (L.A.W.) an international legal access and litigation management firm. In 1987, Mr. Webre produced and hosted "The Instant of Cooperation", the first live radio broadcast between USA and the then Soviet Union, carried live by Gosteleradio and NPR satellite on WBAI-FM. In 1996, he was an elected delegate to the Texas Democratic Presidential Convention in Dallas, Texas.

In 2000, he was a presenter at the Presidential Forum on Off-Planet Cultures Policy at the Santa Clara Convention Centre in California. Since 2002, he is the host of "The Monday Brown Bagger", a public affairs radio talk show on Coop Radio in Vancouver, British Columbia. He is a founding director of Canada's No Weapons in Space Campaign (NOWIS) established in 2002. In 2004, he created the Campaign for Cooperation in Space (CCIS), an international organization where he works with others to prevent the weaponization of space and promote the transformation of the war economy into a peaceful, cooperative space exploration industry. In March 8, 2004, Mr. Webre attended the Council of Canadians public forum at the Maritime Labour Centre in Vancouver. On March 14, 2005 Mr. Webre joined the editorial and advisory team for Peace Media. On February 16, 2007, Mr. Webre said that the 2007 Chinese anti-satellite missile test occurred in order to stop the United States from proliferating weapons in space.

Exopolitics

After a lifetime of experiences, research and interactions with key players, Mr. Webre believes that there is intelligent extraterrestrial life in our Universe. He is the author of the online e-book, "Towards a Decade of Contact" and the book *Exopolitics: Politics, Government, and Law in the Universe*. The exopolitics model functionally maps the operation of politics, government and law in an intelligent Universe, and provides an operational bridge between models of terrestrial politics, government and law, and the larger models of politics, government and law in Universe society.

Mr. Webre believes that as exopolitics posits, the truest conception of our human circumstance may be that we are on an isolated planet in the midst of a populated, evolving, highly organized inter-planetary, inter-galactic, multi-dimensional Universe society. He believes that we live on a planet that has been quarantined and that we are now being given an opportunity to join the rest of the spiritually evolved Universe Society in peace, thus an opportunity to avoid environmental global self-destruction or global self-destruction through war.

Mr. Webre's views are not unlike the conclusion of other independent researchers such as Associate Professor of Political Science, Dr. Courtney Brown and the late Harvard Medical School Professor of psychiatry, Dr. John Edward Mack, who believed that we must become "galactic citizens".
